HISTORY

The association was formed by a group of student that, with the passion born from the meetings with the teachers Bianca Ferrari and Luciano Arfini, they decided to meet once a week for study in deep physic.

With the years more and more students decide to join and the group's activities.

On the *19th April 2005*, for the centenary of Einstein's scripting, "*Giovani per la scienza*" (young for science) *born* as an official association, with registered office at Unione Industriali and operational office at University Campus of Savona.

Today the association counts more than 100 members, with the support of *Unione Industriali*, of *Fondazione de Mari*, of *SPES* and of *CENS*.

On 29th August 2017 the new laboratories have been inaugurated, they have been set up by guys, kindly granted by University of Genova, located in Delfino's building.

OUR ACTIVITIES

University Campus: every *Friday afternoon*, from 2.10 p.m., they gather many students from several high schools: Ferraris-Pancaldo, G. della Rovere, G. Chiabrera, O. Grassi, L.B. Alberti, A. Issel, Calasanzio.

University members perform tutor's role for younger students. The three hours meeting are divided in: *theoretical studies* (1h), *experimental activity* (1h) and *mathematical studies* (1h). *Saturday morning* (9.30-12.30 a.m.) experiments.

Physics and Beyond: Every *Wednesday afternoon* (2:30 - 4.30 p.m.) the junior members (14-15 y.o.), supervised by senior members, meet at the laboratories of high school Ferraris-Pancaldo, in Savona.

PROJECTS

"Fabbriche Aperte - i giovani incontrano le industrie", every year about 60 members show students of middle school during the visit to the factories of the province.

"Da Savona a Rotterdam: i Giovani per la Scienza si raccontano", the founding members, that are now working all over the world, tell their journey to new members.

"Savona: La Città dei bambini", interactive experiments for children.

Le Notti Bianche Savonesi, light experiments in the "nights of the city".

Collaboration with important national associations: *INFN* (Istituto Nazionale di Fisica Nucleare), *Centro Fermi*, *SIF* (Società Italiana di Fisica).

Since 2016 the G.p.S. organizes *"Savona, i Giovani e la Scienza"* as *part of the Science Festival of Genova*.

This year the exposition will be from *28th of November until 5th of December*; the event takes place in the rooms of "Palazzo del Commissario" in Savona's Priamar castle, with an itinerary with interactive experiments showed and build by members.
